

We are pleased to announce that our Trustee Registration Service now includes the option to register trusts in Ireland on the Central Register of Beneficial Ownership of Trusts (CRBOT).

Trusts with UK trustees where there is an Irish business interest (most commonly Irish sited assets such as a Dublin based offshore bond) must register in both the UK and Ireland. You can find the [CRBOT homepage here](#) for more information and you can view a handy [FAQ document here](#) in relation to UK trustees, prepared by the Irish Revenue.

When accessing our Trust Registration Form via our [dedicated TRS website](#), users will now be asked if the trust has a business relationship with Ireland (e.g., if the trust holds assets in an Ireland based insurance policy / bond). If yes, a series of additional questions will follow to allow Irish registration.

The fees for this service are as follows:

UK TRS:	£250 + VAT
Ireland/CRBOT:	£350 + VAT
TRS & CRBOT:	£570 + VAT (5% discount)

QB Partners Trustee Registration Service is provided in conjunction with Zedra Trust Company.

EXISTING USERS:

Those familiar with our process already for UK registration, should note the following differences for Irish registration:

- When completing our Trust Registration Form and you tick to confirm that the trust has a business relationship with Ireland, it will ask for confirmation of which jurisdictions you wish us to register the trust (UK/Ireland/UK & Ireland).
- If we are registering in Ireland under CRBOT, you will see additional information requirements, including a document upload box for a Passport copy or Proof of NI/Tax Number for beneficial owners (i.e., settlors, trustees, protectors & beneficiaries*).
- Once form submitted, you will receive an email with an agreement for lead trustee signature and payment instructions. Once agreement signed and fee paid, Zedra will register the trust & issue you with a copy of the data submitted and a registration certificate. Advisers can store this as evidence of compliance and share with providers etc. (the Irish CRBOT system is non certificated, but we will provide a registration number).
- For Ireland we can only operate as an agent (TAIN licence), so cannot share any passwords/credentials used in registering the trust with the Lead Trustee (like with UK TRS). However, UK trustees can go direct to the Irish CRBOT service to make updates once the initial trust registration is completed.

**please note that beneficiary details are not required on discretionary trusts where the beneficiary is included in one of the classes of beneficiaries.*

If you have already used our service to register a client's trust in the UK, and it now needs to be registered in Ireland too. You do not need to go through our online TRS form to re-enter the data, we can provide a stand-alone agreement and data capture form for CRBOT and we will apply the 5% discount when quoting our 'QBTRS' reference number.

Please contact me for more information on UK and/or Irish trust registration requirements, and to discuss the updates to our service/process further.
